

Redstone Adopt-A-School Program

Redstone Vision: *Helping members, their families, and our communities achieve their financial dreams.*

Redstone Mission: *Improving the financial well-being of our members, and communities by offering trusted advice, choices, opportunities, and solutions.*

Since 2018, Redstone Federal Credit Union has proudly partnered with local schools to build relationships that matter — because every child deserves a community that believes in them.

What started as a simple lunch with a student has blossomed into a meaningful program reaching more than 40 schools, with around 90% being Title I. Along the way, we've learned something important: while funding matters, schools also need people who care enough to show up, listen, and make a difference in big and small ways.

At Redstone, our **Adopt-A-School Program** puts the power of **People Helping People** into action. Through this program, Redstone branches and departments “adopt” a local school, taking time to learn their unique needs and rallying around them with real, hands-on support. That might look like providing duty-free lunches for hardworking teachers, cheering on students at field day, running seasonal supply drives, offering reading support, or simply being there when an extra set of hands is needed.

Because when a school feels seen, supported, and valued, it creates a ripple effect — one that impacts students, families, and the entire community.

If you'd like your school to be part of something special or have questions about our program, we'd love to hear from you. Reach out to us at adoptaschool@redfcu.org.
